Comprehensive eye care - children

We hope you have been reassured by your visit with us today. The NHS subsidises free eye basic eye tests for all children under 16, however today we performed our comprehensive eye exam as your optometrist considered these tests to be essential to properly examine the health of your child's eyes.

Eye examinations at Cameron Optometry

Cameron Optometry is home to world-leading eye care technology, providing clients with an unrivalled level of screening by some of Scotland's most qualified optometrists. In order for us to do this, we usually charge £15 for children in full-time education to have the detailed eye exam which your child had today. We heavily discount the cost as we feel that the tests are essential to provide us with a complete picture of your child's eyes. Our existing clients take great reassurance from the level of detail we are able to provide.

Your next visit

We will recommend these tests again for your child at the time of booking their next appointment to allow us to look for any signs of change, deterioration or anything else that may cause concern relating to the health of your eyes. We recommend an eye exam for children at least every two years.

Please also ask about our Vision+ membership scheme which gives you and your family access to the most comprehensive eye care available in a cost-effective way.
